

Invitation

Stakeholder Meeting on the
business opportunities using
East of England Timber

27 May 2010

10.00 - 15.20

Santon Downham, Brandon, Suffolk

We want your help to find out what business opportunities there are in using East of England timber.

Key stakeholders in the region including house builders, housing associations, millers, timber merchants, SIPs manufacturers and forestry owners are invited to participate in an event that highlights new research into East of England timber.

We will be asking what you think should be the priorities, supply chains and products that should be the focus of an integrated project to realise the potential business opportunities.

Places are limited and priority is given to those in the following sectors - forestry, primary processing (millers), merchants, secondary processors and housing.

This is a FREE event with lunch provided

Registration

If you wish to attend, please respond by 14 May to Julia O'Rourke, InCrops events co-ordinator, by email j.ourourke@uea.ac.uk (please include 'East of England Timber' in your subject line) or telephone 01603 591765

InCrops

The InCrops Enterprise Hub is based at the University of East Anglia with project partners across the East of England. It provides specialist business support for innovation and the commercialisation of new biorenewable and low carbon products, building on the region's world-class research capability in alternative and non-food crops. www.incropsproject.co.uk

BRE

BRE is an independent and impartial, research-based consultancy, testing and training organisation, offering expertise in every aspect of the built environment and associated industries. www.bre.co.uk

Forestry Commission

The Forestry Commission is the Government Department with statutory responsibility for trees and woodlands. In the East of England the Forestry Commission manages over 25,000 hectares of woodland. www.forestry.gov.uk

Norwich Business School

NBS is one of the largest Schools in the University of East Anglia. According to RAE 2008, 90% of NBS research is considered of international quality with 45% of all its research defined as 'world-leading' or 'international excellent'. www.uea.ac.uk/nbs
