

BIOPHARMACEUTICALS

- The biopharmaceuticals sector has a value of €45bn for plant-derived medicines
- The projected growth of this sector is up to 8% per annum
- There is substantial potential for production of complex chemicals in plants
- The sector can provide the verification of traditional herbal medicines
- Areas where biopharmaceuticals can be beneficial can be seen in treatments for cancer, diabetes and cardiovascular diseases

INCROPS CAN HELP BY

- Supporting both the discovery and development of new drugs from plant sources
- Providing a connection to the UK/EU knowledge base for verification of traditional medicines
- Facilitating access to IP generated in the InCrops partnership that has relevance to biopharmaceutical industries
- Connecting client companies with relevant IP to potential international licensees
- Facilitating collaborative R&D between InCrops partners and clients to discover and improve plant-derived pharmaceuticals
